**Re: Women/Men Change Rooms & Third Floor Terrace  
Renovations-Update**

The second floor change room renovations are progressing. All interior demolition has been completed and the remedial mechanical, electrical and plumbing repairs are nearing completion. The sauna is being replaced with steam rooms in each of the men's and women's change rooms.

We expect the work to be completed by December 31, 2009.

The custom railing has been fabricated for the third floor terrace area and our landscape architect has confirmed it will be installed by the end of this week. The landscape architect has also confirmed that the outdoor sink servicing the BBQ area will be installed the week of October 12<sup>th</sup>.
